

**PRESS RELEASE**

**IMMEDIATE RELEASE**

**SAP Software Partner for 12 Years**

**DocuWare-SAP Seamless Integration**

***New Windsor NY, – February 28, 2013 – DocuWare, a global leader in document management solutions, announces that its new version, DocuWare 6, meets all requirements as an SAP-ArchiveLink Interface. This was recently confirmed by SAP AG through its formal certification of the newest interface. The seamless link between DocuWare's document management system and SAP's ERP solution is guaranteed.***

DocuWare has been a Certified SAP Partner since 2001, and submits their software and interface on a regular basis to SAP for its standardized testing. DocuWare 6, including its newest interface, has successfully completed all test phases and earned its "SAP Integration Certification" stamp of approval for the 12<sup>th</sup> year. This includes certification of such features as HTTP Content Server, OLE-Frontend, Barcode BAPI and Solution Manager Ready.

**Retrieving Documents Directly from SAP**

The DocuWare integration enhances SAP NetWeaver solutions with features for archiving documents and data using the SAP ArchiveLink interface. For example, incoming/outgoing documents, print lists, SAP archive files as well as PC files from applications like Microsoft Word or Excel can be stored directly out of the SAP system in the central document pool managed by DocuWare.

With this integration, documents can be retrieved in seconds, right out of the ERP solution – the user never has to leave the familiar interface. Business processes can be seamlessly integrated and handled more rapidly. In addition, DocuWare also gives users the ability to search for, display and print documents that exist outside of the SAP system.

### **About DocuWare**

From Documents to Value: DocuWare enables any size organization - in any industry - to transform documents into valuable capital. Regardless of format or source DocuWare automates business processes and workflows by electronically managing and sharing documents. Documents are readily available, where and when needed; one search quickly locates related documents.

Whether as an on-premise or as a cloud solution, DocuWare provides all the components needed for Enterprise Content Management. These solutions are highly scalable, offer a low Total Cost of Ownership (TCO) and DocuWare is ISO Certified, FDA Compliant and rated 5-Star by Buyers Lab Inc. (BLI).

DocuWare (founded 1988) ranks among the world's leading Document Management software companies. The company operates worldwide from Germering near Munich and from New Windsor, New York with subsidiaries in the UK, Spain and France. Its products are available in 70 countries and 16 languages to over 100,000 users in approximately 10,000 installations.
